

SabrEXTM

ROOT INOCULANT

for WHEAT AND CEREALS

- **Increase yields**
- **Easy to apply**
- **Bigger root systems**
- **More tillering**
- **Improves stress resistance**
- **Better fertilizer/water efficiency**

**Call ABMTM at 1-877-617-2461 for more information
or to find your nearest dealer.**

SabrEx™

ROOT INOCULANT

for WHEAT AND CEREALS

SabrEx™ is the next generation in a line of proven seed treatments for field crops from ABM™. The formulation for wheat and cereals is easy to use, while delivering impressive and profitable crop responses.

- Typical yield responses of 5.3 bu/a
- The newest result from a decade of land grant seed treatment research
- Contains a patent pending formulation that can induce resistance to stresses such as drought
- Creates bigger root systems and increases tillering
- Proven to increase efficiency in fertilizer and water use
- Two formulations for easy application on your farm or by your commercial seed treater/dealer
- Produces results when used alone or with your seed fungicide program
- Available through your local ag chem or seed dealers

iGET™ Technology

The proprietary and patent pending biologicals first colonize the crop root system. Their association with the plant induces gene expression and changes in the plant physiology to enhance multiple biochemical pathways. Crop stresses such as dry weather can be alleviated, and often systemically – so that root colonization by the seed treatment can affect the physiology of the whole plant, even foliar/leaf biology.
