**FC 397**

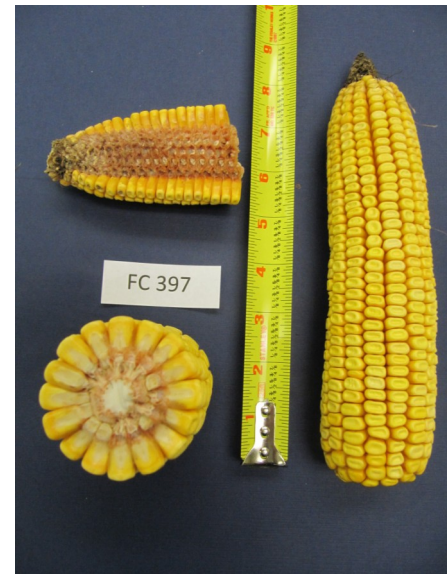

## Hybrid Characteristics:

- FC 397 is a tall hybrid with high consistent yields for grain or silage.
- Excellent stalk strength with good roots.
- Great drought stress for its maturity.
- This flex ear has a wide planting range from 28-34, depending on soil productivity.
- This is a tall plant with medium high ear placement.
- Has shown great consistency for high grain yield and silage.
- Typically 16-18 kernel rows on a semi-determinate ear.

Ratings: Superior 9-10 Excellent-8 Very Good -7  
 Good-6 Average-5 Below Average 0-4

## Management Tips:

- Broadly adapted for highly productive to average productive fields.
- Outstanding early vigor for no-till and first planted colder soils.
- Use caution moving south due to foliar health
- Can be positioned as a good delayed harvest hybrid.
