

1ST Choice Seeds®
1st in Seed Quality

- Options:**
- FC 651 C
 - FC 651 GT
 - FC 651 3000GT

Hybrid Characteristics:

- Unique genetic platform that has shown consistent high yield performance.
- Typically a very girthy ear, 16-20 kernel rows that flexes on girth and kernel depth.
- Deep kernels with good test weight.

Ratings: Superior 9-10 Excellent-8 Very Good -7
 Good-6 Average-5 Below Average 0-4

Management Tips:

- Moves well north and south of its maturity zone.
- Has shown a positive response to foliar fungicide.
- Flowers like a 112 day hybrid, dries down quickly in fall.
- Can lose tops of stalks early before harvest and has very good late season standability.

Recommended Planting Population		
Low	Medium	High
28-30,000	30-32,000	32-35,000
Relative Maturity		110 day
Degree Days		2700
