

1ST Choice Seeds®
1st in Seed Quality

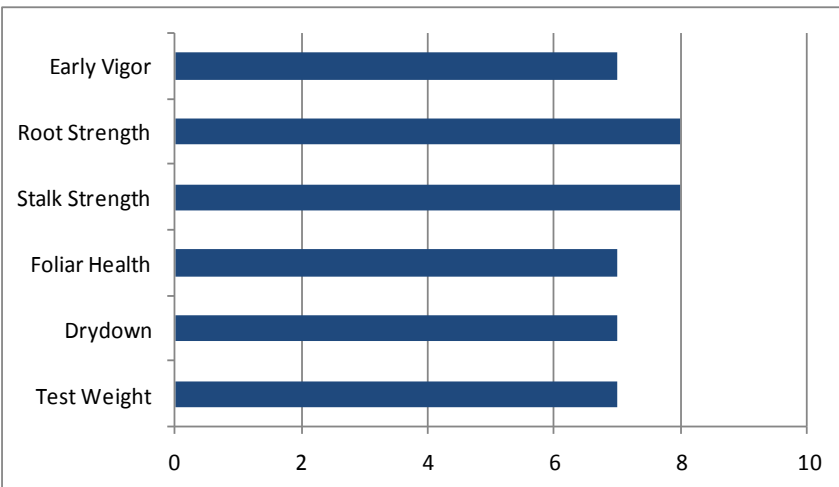

Options: • FC 740 VT2PDG

Hybrid Characteristics:

- New DroughtGard Technology for 2016.
- Widely adaptable across soil types and conditions.
- Average staygreen, but maintains very good intactness.
- Very good stalk and root ratings.
- 16-18 kernel rows with excellent tip fill.

Ratings: Superior 9-10 Excellent-8 Very Good -7
 Good-6 Average-5 Below Average 0-4

Recommended Planting Population		
Low	Medium	High
29-30,000	30-32,000	33-35,000
Relative Maturity		111 day
Degree Days		2780

Management Tips:

- Drought tolerance has been tremendous in field trials.
- Can be managed for higher planting populations on the highest productive soils.
- Excellent corn-after-corn option.
